

1

Download Snapchat from the App Store or Google Play.

Open Snapchat and point your camera at a Snapcode.

2

Press and hold on the Marie Keating Foundation Snapcode on your screen to scan it.

3

The AR filter will appear on screen over your picture. OR if you point the camera toward another subject the filter will appear over them (below).

4

Press each of the hotspots to reveal the different symptoms.

5

Tap hotspot

6

Tap hotspot

7

Tap hotspot

8

Tap 'more' button to link to more information about lung cancer on the Marie Keating website

9

Press the circular Icon at the bottom of screen to take a snap picture, or hold to record video.
